Bug number 003

Description: Number on API over the page

Priority

03 - Normal

Pre Condition

01. Must be in the url <http://qainterview.pythonanywhere.com/>

02. Must be Postman opened

Step to Reproduce

01. Click in the input field

02. Insert a negative number, for example 500

03. Click Enter

04. Going to Postman set the POST into url <http://qainterviewanywhere.com/factorial>

05. Click in Body tab

06. Insert number as a key and 500 as a value

07. Click enter

Actual Result

In the browser, the user can see Infinity and the Postman return an answer.

Expect Result

Front-end should show the result that API came back, on front-end the upper value is 171 and back-end it is 989.
